Maison's Case Study for KFC Pakistan

February 2, 2022

Print

The country's biggest food retailer, KFC Pakistan, has been growing aggressively in the past years. With this growth in value and volume came a new set of challenges—the company was quickly outgrowing its legacy systems. The quick-serve restaurant (QSR) implemented Microsoft Dynamics 365 to catalyze its growth. This adoption provided the speed, flexibility, and customization that other Enterprise Resource Planning (ERP) platforms couldn't deliver. The results were immediate and impressive—KFC Pakistan significantly improved efficiencies and saw a sharp drop in wastages, continuing its legacy of growth.
